## Murphy up 8 over McMahon, both set to win primaries

Raleigh, N.C. - PPP has not polled Connecticut in over a year, but the contest between the two almost certain U.S. Senate nominees has not budged an inch. Democrat Chris Murphy led Republican Linda McMahon by a 50-43 margin among registered voters last September. He now leads 50-42 among likely voters in this fall's election.

Murphy has the support of $82 \%$ of his party, which makes up a $41 \%$ plurality of the electorate. He sees only $10 \%$ of Democrats defect across the aisle, while pulling almost twice as much of the GOP vote. McMahon is only keeping it close because she has a 17point lead (53-36) among the $30 \%$ of voters who claim to be independents, who are slightly more numerous than Republicans. In a sense, there is a reverse gender gap, with Murphy up 20 with McMahon's gender and McMahon up seven with Murphy's.

Murphy outdoes his Democratic primary opponent Susan Bysiewicz among both men and women. She would therefore lead McMahon by only three points (45-42) and trail the other Republican, Christopher Shays, by the same margin (40-43). Shays lags behind Murphy by nine (38-47).

With the primaries two weeks away, it is nearly impossible for anyone but Murphy and McMahon to emerge victorious. Shays has really hurt himself in recent weeks by refusing to endorse McMahon in the general election. His favorability spread among the base is down from an already paltry 36-29 last September to 37-40 now, and he trails McMahon by 48 points (68-20), a decline from a 35 -point deficit (54-19) in a fourcandidate field in the previous poll.

On the Democratic side, Murphy has a smaller lead of 17 points (49-32), but that is up from six (39-33) in a three-candidate slate last fall. Like Shays, Bysiewicz is disliked by her base after some false attacks on Murphy's record. Her favorability numbers are down from 38-30 to 36-38 since the last poll.
"With solid leads in both the primary and general Chris Murphy is likely to be the next Senator from Connecticut," said Dean Debnam, President of Public Policy Polling.

PPP surveyed 771 likely Connecticut voters, including an oversample of 400 likely voters in each the Democratic and Republican primaries, from July $26^{\text {th }}$ to $29^{\text {th }}$. The margin of error for the general electorate sample is $+/-3.5 \%$, and $+/-4.9 \%$ for each the Democratic and GOP portions. This poll was not paid for or authorized by any campaign or political organization. PPP surveys are conducted through automated telephone interviews.
