## Murphy up on Shays by 4, McMahon by 7 in CT

Raleigh, N.C. - Chris Murphy remains Democrats' strongest bet to hold Joe Lieberman’s soon-vacated Senate seat, with newly announced candidate Chris Shays the GOP's surest horse to take it.

Murphy leads Shays by a 43-39 margin; tops last year’s GOP nominee Linda McMahon, 50-43; and beats former Rep. Rob Simmons, 45-36. Former Secretary of State Susan Bysiewicz leads McMahon only 47-46, and trails Simmons, 42-41, and Shays, 48-37. State Rep. William Tong trails Simmons and McMahon by seven points and Shays by 19. Murphy and Bysiewicz have declined by four to 10 points against McMahon and Simmons since PPP last polled the race in March; Shays and Tong were not tested then.

Most of the shift is because the electorate is projecting as significantly more Republican than six months ago, with Democrats still at a +14 identification advantage. The candidates are holding almost identical levels of support within their own bases, but there have been some shifts toward the Republicans among the quarter of voters who identifiy as independents. Murphy led McMahon by six points in March, but now trails by five; he led Simmons by two, but now trails by two; he also trails Shays by nine with them. Bysiewicz lags with nonpartisans by 13 to 21 points, versus 3 to 14 in the previous poll.

Murphy's competitiveness edge over Bysiewicz is not because he is better-known. In fact, slightly more (70\%) are familiar with the former statewide officeholder than the congressman (63\%). But Murphy is far more popular, with a 35-28 favorability rating, versus Bysiewicz's 29-41. Voters are most familiar with McMahon, but she is also disliked, at 39-49. Shays is seen just slightly better than Murphy, at 37-28.
"Chris Shays could make this a pretty close race," said Dean Debnam, President of Public Policy Polling. "His problem is that Democrats like him more than Republicans. That's not a good formula for surviving a GOP primary with Linda McMahon."

PPP surveyed 592 Connecticut voters from September $22^{\text {nd }}$ to $25^{\text {th }}$. The margin of error for the survey is $+/-4.0 \%$. This poll was not paid for or authorized by any campaign or political organization. PPP surveys are conducted through automated telephone interviews. PPP is a Democratic polling company, but polling expert Nate Silver of the New York Times found that its surveys in 2010 actually exhibited a slight bias toward Republican candidates.
