## IF YOU HAVE BASIC METHODOLOGICAL QUESTIONS, PLEASE E-MAIL information@publicpolicypolling.com, OR CONSULT THE FINAL PARAGRAPH OF THE PRESS RELEASE

## Sherrod Brown leads Blackwell, others by double digits

Raleigh, N.C. - Since PPP last polled on Sherrod Brown's re-election bid in March, the freshman Ohio Senator's chances of earning a second term have remained formidable, beating any Republican thrown at him by 17-21 points, up from 15-19 two months ago. Last Friday's release showed former Secretary of State Ken Blackwell as Republicans’ overwhelming current preference for their nomination, but tested for the first time against Brown, even he cannot come any closer to toppling the incumbent at this early stage.

Blackwell trails, 51-33. Treasurer Josh Mandel and Rep. Jim Jordan post similar 48-31 and 49-31 marks, almost identical to their 48-32 and 49-30 deficits in March. Lt. Gov. Mary Taylor is behind, 50-31, the same deficit as March’s 49-30. Former State Sen. Kevin Coughlin, also tested for the first time, lags by the largest margin, 51-30.

As more voters begin to pay attention, the race will get tighter, as far more Republicans and independents are undecided than Democrats, whom Brown has almost entirely locked up. But while he is roughly tied with independents, Brown takes $11-13 \%$ of the GOP vote, a healthy level of crossover support in this state and political environmentsomething Republicans will have to cut into to have even a shot at beating Brown.

Still roughly a third of his constituents are not familiar enough with Brown and his work to have an opinion on his job performance, but those who do have a good impression. $39 \%$ approve and $28 \%$ disapprove, similar to his 40-30 mark two months ago. Brown also takes advantage of the facelessness of his prospective challengers. None of them is known to much more than half of the electorate, nor does any of them more than break even on the favorability front. Blackwell is the best known but least liked.
"This does not look right now like it’s going to be a top tier race next year," said Dean Debnam, President of Public Policy Polling. "Sherrod Brown is popular enough and Republicans are struggling to find a strong candidate."

PPP surveyed 565 Ohio voters from May $19^{\text {th }}$ to $22^{\text {nd }}$. The margin of error for the survey is $+/-4.1 \%$. This poll was not paid for or authorized by any campaign or political organization. PPP surveys are conducted through automated telephone interviews. PPP is a Democratic polling company, but polling expert Nate Silver of the New York Times found that its surveys in 2010 actually exhibited a slight bias toward Republican candidates.
