## Sherrod Brown up eight over Josh Mandel

Raleigh, N.C. - The Ohio Senate race has tightened a bit in the last month, but incumbent Democrat Sherrod Brown maintains a high single-digit advantage over his Republican challenger, State Treasurer Josh Mandel. Brown leads 48-40 among likely voters, down a tick from the 47-37 margin PPP found in early August.

The closure is due mostly to voters souring on Brown and growing a little fonder of Mandel as they get to know him better. 42\% approve and 44\% disapprove of Brown's job performance, versus 41-37 in the last survey. Mandel is seen favorably by a third and unfavorably by $44 \%$, a bump from 26-42 last time. While Brown is not a particularly popular figure, Mandel is one of the weakest Republican candidates in the country.

Further, unlike in some races in which a challenger is less known than the office's current occupant, Mandel stands little to gain from raising his profile unless he also drastically improves his image. Among voters who already have an opinion on both Brown and Mandel, whether positive or negative, Brown is up by 12 points. On top of that, Mandel cannot hope that the undecideds fall according to general partisan preferences or that he receives downballot love from Mitt Romney supporters. Undecideds in the Senate race are split evenly between President Obama and Romney and between Democratic and Republican congressional candidates.
"Sherrod Brown's had a consistent good sized lead in our polling all year," said Dean Debnam, President of Public Policy Polling. "Josh Mandel has not proven to be a very strong candidate."

Speaking of the generic congressional ballot, there has been a huge shift on that front in the last month. While Republicans led by four points then (45-41), Democrats lead by two now (46-44).

Voters are confused about Issue 2, which would establish a bipartisan redistricting commission. When asked the exact ballot language, it fails by five points (33-38), but last month, support for an independent commission was passing by 13 points (37-24).

PPP surveyed 1,072 likely Ohio voters from September $7^{\text {th }}$ to $9^{\text {th }}$. The margin of error for the overall survey is $+/-3.0 \%$. This poll was not paid for or authorized by any campaign or political organization. PPP surveys are conducted through automated telephone interviews.
