## **Right Wing Religious Groups, Unions Unpopular in NC**

**Raleigh, N.C.** – A new Public Policy Polling survey looking at the impact endorsements from various types of advocacy groups have on voter preferences in North Carolina finds that having the support of right wing religious groups and unions has the greatest potential to be harmful at the polls. Nods from teachers groups and police/fire groups can be the most helpful.

50% of voters in the state say they'd be less likely to vote for a candidate if they had union support and 43% said they would be less likely to do so for one endorsed by right wing religious groups.

They have an even more negative view toward letting these groups influence elected officials in the legislative process. 72% of respondents say they would be less likely to vote for a candidate who altered a bill due to pressure from a union and 64% say they'd be less inclined to support one who bowed to pressure from a right wing religious group.

“This poll is a cautionary tale to politicians who listen too much to noisy minorities,” said Dean Debnam, President of Public Policy Polling. “While conservative religious groups are effective at mobilizing their members on things like sex education and the bullying bill, creating an illusion of broad based support for their agenda, the reality is that the majority of North Carolinians look down on legislators letting themselves be influenced by these organizations.”

The feeling that legislators should not let right wing religious groups or unions influence legislation is held by Democrats, Republicans, and independents. That is particularly true among Democrats, 78% of whom say legislators should not bow to pressure from right wing religious groups and 63% of whom say the same about unions.

PPP surveyed 500 North Carolina voters from June 9<sup>th</sup> to 11<sup>th</sup>. The survey's margin of error is +/-4.5%. Other factors, such as refusal to be interviewed and weighting, may introduce additional error that is more difficult to quantify.
